FLARE DESIGN & CONSTRUCTION

PURGIT designs and builds **mobile and stationary** flare systems with fully automated controls and multiple layers of safety. Our local manufacturing facility allows us to fabricate any flare system quickly, efficiently, and cost effectively.

COMMON INDUSTRY APPLICATIONS*

- H2s & Btex Waste Fumes - H2s Odor Control
- Gas, Chemical & Storage Loading Terminals
- Tank Farms, Tank Cleaning, Tank Degassing
- Petroleum Refining & Production Industry
- Gas Distribution & Pipeline Facilities
- Ethanol Plants & Ethanol Production
- Truck & Barge Cleaning Facilities
- Crude Oil Gathering Locations
- Wastewater Treatment Plants
- Pipeline & Pipeline Pigging
- Anhydrous Ammonia Flare
- Hydrocarbon Processing
- Low Btu Waste Streams
- Chemical Processing
- Oil & Gas Production
- Specialty Chemicals
- Marine Terminals
- Pressure Vessels
- Sulfur Recovery
- Benzene Vapor
- Petrochemical
- Process Vents
- Tank Barges

*PURGIT operates a turn-key, mobile flaring service for sites all over the United States. This service group also operates a variety of cryogenic rated vaporization equipment and liquid nitrogen tankers. Our project coordinators and operators have over two decades of experience and can offer consulting support for any pipeline/vessel commissioning or decommissioning.
